RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Original publisher: Moffett Field, Calif. : NASA Ames Research Center, 1990 OCLC Number: (OCoLC)60248548 Excerpt: . . . American Nuclear Society and the American Society of Mechanical engineers have prepared, respectively, guidelines for V and V of scientific and engineering computer codes for the nuclear industry 4s and quality assurance requirements for computer software for nuclear facility applications. 4e The development of a software is by a process referred to as a waterfall usually done model or software life-cycle phases. Generally, the model passes through the following stages: requirements, preliminary design, detailed design, coding, integration and testing, installation and checkout, operation and maintenance, and retirement. The development is categorized either as precededent or unprecedent, the main difference between these two categories being the level of understanding of the requirements. The current development of computer codes for the CFD design process for aerospace planes falls into the unprecedent category (Fig. 1). At the completion of technology development aerospace programs, the development of computer programs for the follow-on programs would be categorized as precededent developments. The defense and nuclear industries develop software for specific requirements and...
